1) First, export your PokéScape save file.

2) Convert your save file. This converter works: https://savefileconverter.com/#/gba/gameshark

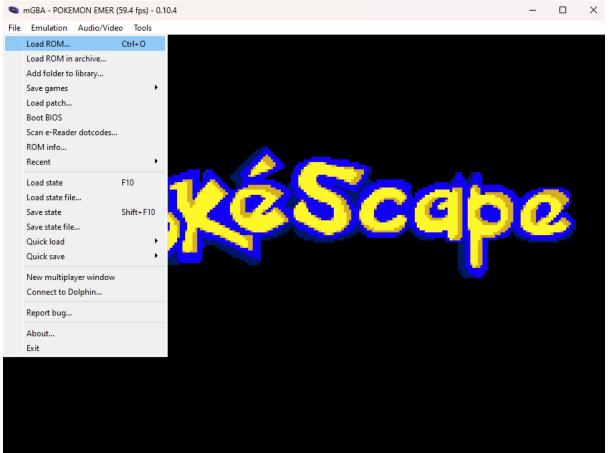

GameShark	<ul><li>→</li><li></li></ul>	Emulator/Raw		
PokeScape 2.0.0.sps		PokeScape 2.0.0.srm	Browse

Help: how can I copy save files to and from a GBA cartridge?

Help: how do I copy save files to and from my GameShark?

Make sure you are converting FROM an "Emulator/Raw" file. It should look like the above. You will need to have the "PokéScape.gba" file downloaded. You can do that here: <u>https://digitalbox.co.uk/PS/legacy.php</u>

3) Go to mGBA and load the "PokéScape.gba" rom you just downloaded.

## PokéScape save to mGBA

## 4) Convert the save to mGBA format.

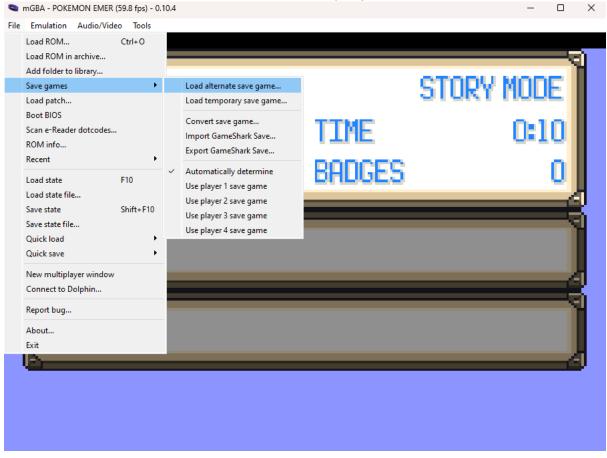

mGBA - POKEMON EMER (60.1 fps)	- 0.10.4	- 0	)

## PokéScape Version 2.0.0 to mGBA Version 0.10.4

PokéScape save to mGBA

PLAYER AAAAAAA TIME	
	0:10
Convert/Extract Save Game X	0
G:/Downloads/PokeScape 2.0.0.sps Browse	
GBA SharkPort 128 kiB flash save game	
G:/Downloads/Pokescape 10min.sav Browse GBA 128 kiB flash save game	Ì
Save Cancel	

5) Load an "Alternate Save" and select the output file you just created.

Your save should now be present on the mGBA emulator.

\*This hasn't been tested and game breaking bugs may appear.

## **BONUS BACK TO BROWSER!**

1) Get your mGBA save and head to: https://savefileconverter.com/#/gba/gameshark
